Hot Politics in South Carolina.

Politics in the whole country and especially in the south, are undergoing an evolution. The two successive defeats of Mr. Bryan on a platform containing emphatic declarations against trusts and imperialism, and in opposition to the gold standard; our annexing foreign territory and camping our army in different places in the orient are partly explanatory for the new movement in politics.

Senator McLauren heads the new movement in South Carolina and in a speech to his constituents at Greenville places himself almost identically in line with the policies of the national administration. The gage of battle he throws down has been accepted by Senator Tillman, who represents all that the Chicago and Kansas City platforms stand for, and upon that issue will go before the democracy of the Palmetto state.

Both senators have placed their resignations in the hands of Gov. McSweeney.

Senator McLauren had only two years to serve out his term, while Senator Tillman had just been elected for six years.

Senator Tillman's proposition that both he and Senator McLauren should resign to test, if any, the strength the new movement has made on the minds of the democrats of his state, was proper, timely and patriotic, and Mr. McLauren's acceptance of the challenge is creditable.

The battle is now on in earnest and South Carolina will witness red hot politics for the next two or three months.

How To Gain Flesh

Persons have been known to gain a **pound a day** by taking an ounce of **SCOTT'S EMULSION**. It is strange, but it often happens.

Somehow the ounce produces the pound; it seems to start the digestive machinery going properly, so that the patient is able to digest and absorb his ordinary food, which he could not do before, and that is the way the gain is made.

A certain amount of flesh is necessary for health; if you have not got it you can get it by taking

Scott's Emulsion

You will find it just as useful in summer as in winter, and if you are thriving upon it don't stop because the weather is warm.

Working Convicts in Our Phosphate Mines.

A strong sentiment was manifested against working the convicts in the phosphate mines as it was shown that it was almost ruin to that industry. A bill to prevent which passed the house by a majority of nine but was killed in the senate by a tie vote.
